

## NH Debate - 17

### Pilgrimage and Safety

India's annual budget volume is approx. INR 13 lakhs crores and Hindus annual charity is approx. INR 12.5 lakhs crores....it's the biggest charity annually done by any Indian religion, no other religion in India even reaches one-tenth way of it (NO OTHER RELIGION)....even then Hindus pilgrimage and pilgrims both are so highly prone to natural calamity...what the govt. and all kind of social as well as religiously affiliated beneficiaries do/have been doing with this money if they can't even ensure a full-proof pilgrimage of Hindu pilgrims? And this amount is annual not a cumulative sum of charity of many years or centuries and is almost equal to annual budget of India?

Let's put any aid or scheme from governmental money aside for a moment and think about what, how, who and where this money goes/is used/have been used? Even if the 10% of it would have honestly been used in developing safe and convenient Hindu pilgrimage, it won't have faced a pilgrim's draught for next three years a minimum (as per agency reports, UK Pilgrimage may take a minimum 3 years to restore).
