

**Reservation should be on economic basis
instead of caste base - Janardan Dwivedi**

It is completely nonsense. What is the guarantee that on the name of economic line reservation, the upper-castes people would not ensure entry to their poor people only and then the deprived classes who right now are getting at least some share/chances due to caste bound reservation, would be deprived by upper caste goons maximum on the name of favoritism? Can Janardan Dwivedi guarantee on it, especially when whole social system of India is based on Bhai-Bhatijavaad and favoritism, no he can't; thus all it will clinch the upper caste poors only! And if any from deprived communities would get entry then only after poors of upper castes.

This idea shouldn't be heeded; it will bring back the Samantvaad (feudalism) in nation again. So it is nothing but a by-pass method of upper castes to rule the lower communities in medieval fashion again. Yes, if they want to draw the economic lines, then draw within the caste reservation, which in fact for the case of OBCs is already in place and if necessary can be extended in SC/ST classes too.

Janardan Dwivedi sir, instead of this you should demand reservation for deprived and backward classes in private sector now.
